Citizenship: EU Passport Holder (Danish)

Professional Summary

Senior Product Designer (UX/UI) with 8+ years of experience architecting complex fintech, enterprise SaaS, eCommerce, AI-driven workflows, and data-dense B2B platforms. Specialized in translating high-ambiguity business goals into intuitive, high-adoption digital products that reduce support overhead and accelerate engineering velocity. End-to-end expertise spans product strategy, discovery research, interaction design, WCAG accessibility, and DesignOps. A trusted partner to Product Managers and Engineering leads, leveraging advanced Figma workflows, scalable design systems, and design tokens to ship production-ready features on fast release cycles.

Work Experience

Senior Product Designer | UX/UI Design and Quality Engineer

LEKAB Communication System AB | Stockholm, Sweden | 12/2022 - 11/2025

Enterprise Platform Architecture: Led end-to-end product design and system architecture for LEKAB's enterprise portal and built a zero-to-one Business Messaging platform for SMS and RCS campaigns.

Support Cost & Ticket Reduction: Mapped complex billing, account, and messaging workflows into intuitive self-service interfaces, cutting customer support calls by 30% and improving usability scores by 35% via a digital complaint-tracking system.

Design Systems & Operations (DesignOps): Designed a cross-team support platform and established the company's first tokenized Figma design system. Accelerated engineering velocity by 20%, reduced visual bugs by 50%, and minimized sprint rework through early validation.

Cross-Functional Delivery: Partnered with PMs, engineering squads, and data teams across discovery and delivery to produce user flows, interactive prototypes, and production-ready specifications for intricate business requirements.

Senior Product Designer (UX/UI & Design Consultant)

Nordic & Global Client Engagements | Hybrid / Remote | 04/2018 - 11/2022

Product Growth & Funnel Optimization: Delivered end-to-end UX/UI architecture for web and mobile SaaS products across Nordic and Asian markets. Utilized user research, interviews, and funnel analytics to overhaul onboarding flows, significantly reducing registration drop-offs and driving long-term product adoption and retention.

AI Integration & Handoff Efficiency: Integrated AI-assisted workflows into rapid prototyping routines. Built code-aligned Figma design systems, interactive prototypes, and dev-ready specs for distributed Agile squads across multiple time zones.

Autonomous & Cross-Cultural Leadership: Spearheaded client engagements autonomously from initial discovery through production, sharpening end-to-end accountability and cross-cultural adaptability when tailoring product strategy to international markets.

Languages

English (Fluent), Danish (Good understanding), Swedish (Actively advancing)

Technical Skills and Competencies

Product & Interaction Design:

Product Discovery, Information Architecture (IA), UX Strategy, User Research, Wireframing, Rapid Prototyping, Usability Testing, Interaction Design

Systems & Engineering:

Design Systems Architecture, Design Tokens (Style Dictionary), Component Architecture, DesignOps, Accessibility (WCAG (2.1/2.2)), Design QA, Developer Handoff

Analytics & Usability:

Data-Driven Design, Product Analytics (Mixpanel, Hotjar, Amplitude), A/B Testing, Technical Validation

Product Delivery & Leadership:

Agile and Scrum, Backlog Prioritization, Stakeholder Workshops, Cross-Functional Leadership, Continuous Improvement

Tools & Software:

Figma (Variables, Auto Layout, Dev Mode, Figma AI), AI Tools (ChatGPT, Figma Make, Claude for research synthesis), Adobe Creative Cloud (Illustrator, Photoshop), Miro, Jira

Education

MSc in Information Studies (Human-Centered Informatics) | Aalborg University

ICT Certification (Information & Communication Technology) | Aalborg University

Bachelor's Degree in Digital Concept Development | Business Academy Copenhagen

AP Degree in Multimedia Design & Communication | Lyngby Business Academy

Awards

Best Semester Project (2016), MSc in Information Studies (Human-Centered Informatics), Aalborg University Copenhagen: Developed a functional proof-of-concept prototype that utilized real-time facial expression analysis to capture player affect during gameplay, demonstrating how live bio-signals can dynamically adapt user interfaces to improve accessibility.
